Summary

MERN Stack Developer skilled in React.js, Node.js, Express.js, and MongoDB. Experienced in scalable web apps with REST APIs and real-time features. Passionate about problem-solving, AI tools, and innovative tech solutions.

Technical Skills

Languages & Frameworks: Java, Python, React.js, Node.js, Express.js, MongoDB, HTML, CSS, JavaScript, MySQL, REST APIs

Tools: Git, GitHub, Postman, VS Code

Other: Problem Solving, Team Collaboration, Debugging, API Integration, Responsive Design

Experience

Team Member (Academic Role)

Dec 2024 – Feb 2025

- Built full-stack apps using React, Node.js, Express.js, and MongoDB for academic projects.
- Co-led technical team, mentoring 5+ peers in project execution.
- Developed and deployed college festival website with event management features.
- Optimized app performance, reducing load times by 15% through efficient coding.
- Collaborated with teams to deliver scalable, user-focused solutions.

Projects

College Event Website

2024

- Built MERN-based website supporting event listings and registrations for 500+ users.
- Integrated secure login and responsive UI, optimized for mobile and desktop.

College Management System (Hackathon)

2025

- Developed MERN-based system in 24-hour hackathon for elections, assignments, and attendance for 500+ records.
- Added secure authentication and real-time notifications.

Education

B.Tech, Computer Science and Engineering

SGGSIET, Nanded

GPA: 83%

2023 – 2027

- Built MERN stack projects with REST APIs and authentication. Secured top 5 ranks in 3 national college hackathons.

Certifications & Awards

- Hackathon Winner Certificate & Trophy – National Hackathon 2025
- FreeCodeCamp: JavaScript Algorithms and Data Structures, completed 2024
